Register of Business and Financial Interests

At the beginning of each academic year, the Clerk to the Governing Body will ensure that all governors complete a register of their business and financial interests. This is to ensure there is never a conflict of interest as strategic matters are discussed. By publishing this information, we wish to bring transparency to all of our work, and where a conflict of interest has been disclosed, it will be minuted, accordingly.

For the academic year 2022-2023, the following business and financial interests have been disclosed:
