

## **Mayflower Primary School**

### **The Arts Intent Statement 2021-2022**

#### **Abstract**

At a meeting of the Curriculum Management Team on 02.12.20, faculty members developed their own **intent** statement that was linked to the generic statement prepared beforehand. The following will articulate the intended outcomes of all management processes, and will be tested through **implementation**, and **impact** over time. Each intent statement will be subject to an annual review, and published online, as required.

#### **The Arts**

Our intent for the Arts is to deliver a curriculum which is accessible to all and that will maximise the development of every child's ability and academic achievement.

Within the Arts children have the freedom to develop their own creative identity, whereby they can express themselves through different media. Active involvement in a shared experience will contribute to enhanced wellbeing.

Through the Arts children gain an appreciation of the global Arts community and an understanding of their own place within it: a celebration of culture through the Arts. Children's interests are captured through cross-curricular links, giving them motivation and meaning for their learning.
